Netflix Features Explore Netflix's vast library of movies, documentaries, TV shows, anime, and original content. Watch as many titles as you like, whenever you want. **Google Sites Features** Add files, YouTube videos, calendars, maps, and more to your Google site. You can also import pages or sections from other websites, use HTML, CSS, or JavaScript code, and make your site more accessible. **Common Themes** Both Netflix and Google Sites offer features that enable users to create, manage, and share content with others. While Netflix focuses on media consumption, Google Sites is a web-building platform that allows users to customize their online presence. To embed content from another website or add custom files to your Google Site, follow these steps: **Embedding Content** 1. Open a site in new Google Sites and insert an embed as a full-page element by clicking **Insert Embed** at the right side. 2. Click on **Full page embed**, enter the URL you want to embed, and click **Insert**. 3. To publish your changes, click **Publish** at the top-right corner. If you encounter issues adding content from certain websites, contact their owner for assistance. **Adding Custom Code** 1. Open a site in new Google Sites and insert an embed as a full-page element by clicking **Insert Embed** at the right side. 2. Click on **Pages**, then hover over **Add** and click **Full page embed**. 3. Click **Embed code**, add your code, and click **Next**. 4. Ensure JavaScript code is within ``` tags and CSS code is within `` tags. 5. Click **Insert** to apply changes. **Classic Google Sites** 1. Open a site in classic Google Sites by clicking the page you want to edit at the top. 2. Click **Edit page** and locate where you want to insert a file. 3. Click **Insert**, choose the type of file you want to add, and click **Select or Save**. Before sharing content, ensure you comply with Google's guidelines for acceptable use within their Workspace services. To edit or add text and images, simply click on the respective fields. Please note that only Core Services for Google Workspace are subject to a specific data processing amendment. If you're looking for assistance or answers to a question, feel free to post in the community help section where relevant community members can provide guidance. Relevant tags include online streaming services such as Crackle, Freevee, and YouTube, along with platforms offering movies and TV shows like Tubi and Vudu.
